

PROPOSED TRAVESTON CROSSING DAM

Environmental Impact Statement (EIS) Community Information Day

Queensland Water Infrastructure (QWI) is to hold the first community information day regarding the proposed Traveston Crossing Dam Environmental Impact Statement (EIS).

The information day will follow the release by the Coordinator-General's office of the draft Terms of Reference for the EIS on 9 December, which can be viewed at www.coordinatorgeneral.qld.gov.au/eis

The inaugural community information day will be the first of several to be conducted over the next few months during the Terms of Reference and EIS process.

The community information days will be attended by project team members and include a project information display. Members of the community can also speak with project team members to ask questions or seek clarification on posted information.

The first information day will be held specifically to explain the community engagement process and to encourage the community to participate in the review of the draft Terms of Reference for the EIS. The community will have until 19 February 2007 to provide formal feedback on the draft Terms of Reference to the Coordinator-General.

The scope of the technical studies required for the EIS will be dictated by the final Terms of Reference as issued by the Coordinator-General, which will be determined by feedback from the community as well as State and Federal government agencies, and then issued to QWI for completion of the EIS.

WHAT: Traveston Crossing Dam EIS
Community Information Day

WHERE: 1825 Mary Valley Road, Amamoor
