

# What next?

We understand that you need water solutions BUT

*Health crisis*

**Water  
crisis**

*Road crisis*

**Traveston Crossing Dam on the  
Mary River is NOT one of them**

***Stop the madness: THROW Peter  
Beattie out on September 9 - we  
are TIRED of 8 years of NEGLECT***

***Why? The capital cost per  
megalitre of yield has risen more  
than 5X since the announcement of  
the Traveston Crossing Dam , and  
this does not include the \$ millions  
required to pump the water south.***

***Beattie will waste at least \$2  
billion on a dam that will leak and  
evaporate and will not give water  
before Brisbane runs out in 2008.***

***If he was smart , he would spend  
that money on recycling water,  
desalination, hospitals, roads.***
